

SAFETY SYMBOLS

Your power tool and its Owners Manual may contain "WARNING ICONS" (a picture symbol intended to alert you to, and/or instruct you how to avoid, a potentially hazardous condition). Understanding and heeding these symbols will help you operate your tool better and safer. Shown below are some of the symbols you may see.

Hazard Alerting Safety Symbol communicates information related to the nature of hazards. The pictorial information contained inside this surround shape describes the hazard.

Mandatory Action Safety Symbol communicates actions that should be followed to avoid hazards. The pictorial information contained inside this surround shape describes the action to be followed.

Prohibition Safety Symbol communicates actions that should be avoided. The pictorial information contained inside this surround shape describes the action to be avoided.

Safe Condition Safety Symbol communicates the location of emergency equipment or escape routes. The pictorial information contained inside this surround shape describes the emergency equipment location or direction of escape route.

Safety Alert Symbol is a symbol that is used to alert to potential physical hazards. It also indicates that the product operator should obey all safety messages that follow this symbol to avoid possible injury or death. The safety alert symbol always precedes the three signal words **DANGER**, **WARNING**, and **CAUTION**.

SAFETY SYMBOLS

DANGER indicates a hazardous situation which, if not avoided, will result in death or serious injury.

WARNING indicates a hazardous situation which, if not avoided, could result in death or serious injury.

CAUTION indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

NOTICE is used to address practices not related to physical injury.

Safety instruction (or equivalent) signs indicate specific safety-related instructions or procedures.
